TIER IV

Infrastructures as a Service (IaaS)

- **2000m²** of high-availability colocation services (housing) and a competitive environment of high-end communications with the outside world.
- **700m²** of multi-purpose space: office spaces, conference room, warehouse, etc.
- Hands and eyes.
- Early fire detection and suppression / extinction systems.
- **24x7x365** security.
- Monitoring and uninterrupted maintenance.

Tax benefits

IGIC 7%

The Impuesto General Indirecto Canario (IGIC) which offers benefits in comparison with the IVA (Value-Added Tax).

ZEC 4%

The Zona Especial Canaria (ZEC), to which 4% of Corporate Income Tax applies.

RIC 90%

The Reserva para Inversiones en Canarias (RIC), allowing for a reduction of up to 90% of undistributed profits on the Corporate Income Tax base.

Sustainable environment

Fully sustainable facilities - generation of more than 100% of the consumed energy in a renewable way and 400kW of photovoltaic solar plants on the datacenters' roof.

Characteristics

- **Reliability:** high-availability TIER III+ infrastructures.
- **Modularity:** modular and scalable space to your specific requirements and needs.
- **Neutrality:** high levels of connectivity: first neutral submarine cable station in the world.
- **Location:** scentric position, necessary stopover between the telecommunications paths of the North American, South American, European and African continents.
